Participation of the ENIC Ukraine to the SCAN-D 2 PROJECT

It is a matter of great satisfaction and pleasure to acknowledge the ENIC Ukraine for their role in the SCAN-D2 project.

The main goal of the SCAN-D project is to foster knowledge of different Higher Education degrees in order to promote a better and fair recognition.

The purpose of the project is to collect samples of national degree certificates from Higher Education Institutions of the 24 participating countries: Armenia, Austria, Belarus, Belgium-Flemish Community, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Estonia, France, Ireland, Israel, Italy, Latvia, Lithuania, The Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Slovenia, Spain and, of course, Ukraine.

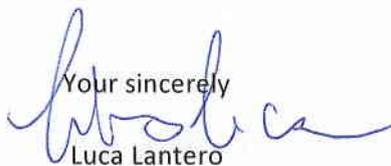

The samples of the degrees are collected in a database accessible to staff of the ENIC-NARIC centres, set up by the Ministries of Education in 55 countries: <http://www.enic-naric.net/country-pages.aspx>. Financed by the European Commission in the framework of the Erasmus+ Programme - Action 3 (Support for Policy Reform), the SCAN-D 2 project started in April 2016 and will end in September 2017.

The ENIC Ukraine uploaded 275 samples of degree certificates in the SCAN-D database, giving a valuable contribution to the project and making a significant effort in promoting the recognition of Ukrainian qualifications abroad.

I consider that your mission was carried out in an extreme professional manner and it met our expectations.

I thank you all for your very professional support and cooperation.

I look forward to future possibilities of cooperation.

Your sincerely

Luca Lantero
Director
